# PlayStation®

The region shown on this map is within the spheres of influence of both the Kingdom of Highland and the city of Jowston, the latter of which is comprised of five city-states and one band of knights. This region is also the site of unending border conflicts.

The Kingdom of Highland, backed by ocean on the East, enjoys close relations with its northern neighbour, the Holy Kingdom of Harmonia. Highland feels a threat to its territorial boundaries from the City Alliance, and thus has made itself into a military power in opposition to the City Alliance.

The City Alliance, for its part, is centered around Lake Dunan, which necessitates that movements between member city-states either circumvent the lake's coastline, or else rely on ships for transport. This situation has caused the Alliance members to unite firmly, making it difficult for external enemies to threaten them.

## BACKGROUND

Once upon a time there was a boy who lived in an army garrison close to the border between Highland and the City alliance. Whenever he closed his eyes, he could picture the town where he was born in his mind's eye. Genkaku, his adoptive father, was strict with the boy, leaving him with many teachings.

Nanami was the boy's foster sister. She and Genkaku were all the family he had ever known, Genkaku and the boy were always in Nanami's thoughts. The boy also had a close childhood friend named Jowy and there were no secrets between them. They learned many lessons and experienced many things in life together.

But there was one thing in the boy's life that meant more to him than anything. And that was the sight of the town of his birth. One day, his eyes met Jowy's, and Jowy laughed. "Changed your clothes already, huh?" he said. "You're really anxious, I see." It was only natural, because tomorrow the boy would be returning to his birthplace, the town of Kyaro.

How the war had started, or for what reasons the present cessation of hostilities had been secured, he had no way of knowing. Of only one thing was he certain, and it thrilled him to the core of his being. He was going home.

The gears of destiny were grinding, slowly but surely, with the thoughts and wishes of multitudes of people passing one another by, sometimes tenderly, sometimes heartlessly.

But his destiny is about to change dramatically and his life will never be the same again...

- L2** Button:  
Cancel/Send Message/Dash
- L1** Button:  
Select/Talk/Examine/Send Message
- Button: Open Menu
- △** Button: Cancel
- Button: Dash
- ×** Button: Select/Talk/Examine/  
Send Message

Simultaneously pressing the **L1**, **L2**, **R1**, **R2**, Select and Start Buttons during the game will return you to the Title Screen.

Directional Buttons:  
Move characters or cursor

Analog Mode Switch:  
Analog mode is not supported  
in this game. Play in digital  
mode (LED:Off).

All buttons function identically to their counterparts on the original controller.

## GETTING STARTED

- 1). Set up your PlayStation® game console according to the instructions in the Instruction Manual.
- 2). Make sure the power is Off before inserting or removing a disc.
- 3). Insert the Suikoden II disc and close the disc cover.
- 4). Insert your controller and turn ON the console.

NB: Do not insert or remove peripherals or Memory Cards once the power is turned on.

Make sure there are sufficient free blocks on your Memory Card before commencing play.

## STARTING THE GAME

After the Konami logo appears, the opening movie will play. Press the Start Button to bring up the Title Screen. Press the Start Button again (when the Title Screen is displayed) to bring up the Start Screen. Choose New Game to begin play.

## PLAYING THE GAME FOR THE FIRST TIME

When you choose New Game, you will be asked to enter the name of the game's hero. Use the Directional Buttons to highlight a given character, then press the X Button (or L1 Button) to enter that character. If you make a mistake, press the Triangle Button (or L2 Button) to cancel it. If you press the Enter Button without entering any characters, the game will display previously entered names at random. Choose the one you like, and press the Enter Button.

## LOADING SAVE FILES

If you have a save file from Suikoden, the prequel to this game, which was made after charging into Gregminster, you may load it before playing this game. Insert the Memory Card with the save file on it into either Memory Card Slot 1 or Memory Card Slot 2. After you have entered the hero's name, you will be asked whether to load the saved data from Genso Suikoden. Choose "Yes" to load save data or "No" to play the game from scratch. You may change Memory Cards after loading a save file.

## QUITTING THE GAME

When you are through with a play session, open the disc cover and remove the disc after it has stopped spinning. Then turn off the power. If you turn off the power first, the disc will not stop spinning, and as a result, you may damage the disc when you remove it.

## CONTINUING A SAVED GAME

Insert a Memory Card (sold separately) into either Memory Card Slot 1 or Memory Card Slot 2. Next, choose Continue from the Start Screen. When the Load Screen appears, choose the appropriate slot and file from those shown.

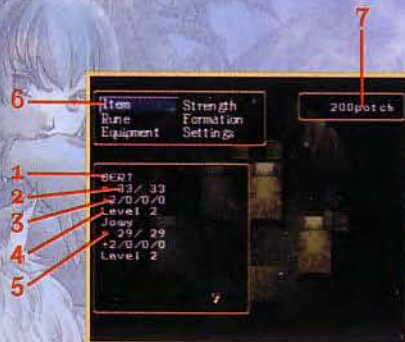

## SAVING A GAME

You may save your game only at inns or at other specially designated places in the scenario.

## THE GAME SCREEN

- 1 Name
- 2 Current Hit Points (HP)/Max HP
- 3 Spell Points
- 4 Level
- 5 Status Display
- 6 Command Window
- 7 Gold

## NORMAL COMMANDS

Press the Button (the Select Button) in the Map Movement Screen to bring up the Command Window. There are six types of normal commands: Item, Equipment, Rune, Strength, Formation, and Settings.

### 1 ITEM

With this command, you may choose to either use, equip (to another character), or discard a given item. Items designated as being "the Party's" are the property of the party as a whole. Items designated as "Special" are used in certain game events, and cannot be discarded.

### 2 EQUIPMENT

With this command, you may equip your characters with armour, shields and other protective gear. First, select the character who you will equip with the given protective item, then choose the body location to be equipped. A list of items, which may be used in this fashion, will be displayed. Choose the appropriate item from this list, and then make your selection. Note that some characters may possess protective items, which cannot be changed. Choose "Best Equip" to equip a selected character with the most suitable protective gear from among those items in the party's possession.

### 3 RUNE

Choosing the Rune Command allows the casting of magic spells. First, choose a character with the ability to use the Runes. A list of spells usable by the character in question will be displayed. Highlight the spell you wish to use, then select it with the **X** Button (or **L1** Button).

In order to use spells, characters must have Runes lodged within their bodies. In Suikoden II, characters may lodge Runes within their Head, Right Hand, or Left Hand, which appear on the display as H, Rh, and Lh. There are four levels of magic spells, each with a different amount of Spell Points. The maximum number of Spell Points with which spells of a given level can be cast is determined by that character's Magic Ability. Characters with low levels of Magic Ability can only cast low-level spells, becoming able to cast higher-level spells as their Magic Ability increases.

Each use of a spell reduces the number of Spell Points for that spell level by one. When a character's Spell Points reach zero, he cannot cast any more spells of that level. Spell Points can be recovered by resting at Inns.

Note: by taking a Sealed Crystal to a Rune Master, characters can have the seal broken, and the Rune contained therein is embedded within their bodies. Characters cannot cast spells without acquiring Runes and having them embedded in their bodies.

### 4 STRENGTH

This command allows you to view the status of each character.

**STR (STRENGTH):** The higher this rating is, the more damage a character can do to monsters.

**TECH (TECHNIQUE):** This rating indicates the character's ability to connect successfully with his own attacks, and to evade attacks by opponents.

**DEF (DEFENSE):** The higher this rating is, the harder it is for opponents to inflict physical damage on the character.

**M DEF (MAGIC DEFENSE):** The higher this rating is, the harder it is for opponents to inflict damage on the character with magic attacks.

**SPEED:** Affects the order of attack. Faster characters attack quicker.

**MAGIC:** Magical Attack Strength. As this rating increases, so do the number of magical attacks a character can make, and the amount of damage those attacks can do to an opponent.

**LUCK:** With a high luck rating, characters can sometimes deliver crushing blows to their opponents. They will also find it easier to dodge those selfsame opponents.

### 5 FORMATION

Use this command to change the positioning (front-line or rearguard) of characters in combat. Positioning affects such things as attack forms and potential targets. See Combat, Page 15, for details.

### 6 SETTINGS

This command allows you to change various settings, including message speed, window, stereo settings, and volume.

## THE HEADQUARTERS SYSTEM

In the course of the scenario, the hero will take control of a castle to use as the headquarters of the Army of the League. By acquiring this castle, he will be able to recruit more than six characters to his cause. He can have no more than six characters in his party at any one time; however, the remaining characters wait in reserve in the castle. While doing so, however, those characters will put their skills to use in working on the castle.

### RECALL SPELL:

If you receive the *Blinking Mirror*, you can recall your party to the castle from anywhere in the game's territory.

### TELEPORT:

Using the *Blinking Mirror*, you can teleport instantly to any village, castle, or other locale that you have previously visited.

### CHANGING PARTY MEMBERS:

You can change party members if you speak to Leona.

### ENGAGING IN WAR:

By speaking with Shu, you may find yourself engaging in *Major Battles* (see page 19 for details).

### COMPOSITION OF FORCES:

You can change the composition of forces if you speak to Apple.

### INNS:

Stop at inns to recover party members, hit points and spell usage, or to save the game.

### ARMOURER'S SHOPS/ITEM SHOPS:

You can buy and sell armour and other protective gear at the *Armourer's Shop*, and items at the *Item Shop*.

### THE RUNE MASTERS:

Characters need to have *Runes* embedded in their bodies in order to use magic spells and special abilities. The *Rune-Master* will do this for you, but you must bring him a *Sealed Crystal*.

### BLACKSMITH'S SHOPS:

You can increase the level of your weapons by having them tempered at the *Blacksmith's Shops*. The *Blacksmith's Shops* have ranks of their own, however, which determine to what extent they can temper a given weapon. You can also use *Rune Pieces* to give your weapons special abilities. The *Blacksmiths* will do this work too.

### THE APPRAISER'S SHOPS:

Among the items you will acquire, as a result of defeating monsters will be items whose names are unknown. Take these unknown items to an *Appraiser's Shop* to have them identified.

### TRADING POSTS:

You can deal in trade goods, in order to earn yourself a living. There are two ways to acquire these goods:

- 1) pick up unknown bric-a-brac on a battlefield, and have it appraised; or
- 2) buy them at a trading post.

Prices for trade goods will fluctuate depending on region and trade good type. You can accumulate a lot of money if you can make use of town gossip to lead you to a profitable trade route.

### RESTAURANTS:

At certain designated locations, you can take the ingredients, you have acquired and make meals. Once made, a given recipe will appear on that restaurant's menu, and can be purchased as an item.

## ABNORMALITIES IN CHARACTER STATUS

## NEGATIVE STATUS

	STATUS	CHARACTER'S CONDITION	CURE
	Poison	Lose hit points each time the character moves	Antidote, Cure Spell, or moving only for limited periods
	Silence	Cannot cast spells	Cure Spell; also cured automatically at end of combat
	Bucket	Hand-to-hand combat accuracy reduced by half	Cure Spell; also cured automatically at end of combat
	Balloon	A balloon is attached to the character's head. Three such balloons will cause the character to float up and off the screen.	Cure Spell; balloons will also pop if the character is attacked in hand-to-hand combat.
	Lose Balance	Cannot move for one turn	Recover on Next Turn
	Knockdown	Cannot move for one turn	Recover on Next Turn
	Unable to Fight	Can do nothing during combat	In combat, Mother Ocean or Shout Spells; Out of combat, drugs or cure spells will enable the character to recover
	Target	Attacks are concentrated on the character	Cure Spell; also cured automatically at end of combat
	Rust	Weapon level reduced	Item or Cure Spell; also cured automatically at end of combat
	Disunite	Cannot make combination (Unite) attacks	Item or Cure Spell; also cured automatically at end of combat

	Paralysis	Can do nothing during combat	Defeat monster that caused paralysis; Cure Spell; also cured automatically at end of combat
	Teleport	Can do nothing during combat	Cured automatically at end of combat
	Sleep	Can do nothing during combat	Take damage; Cured automatically at end of combat; also cured with Cure Spell
	Shrink	Attack strength reduced by half	Cured automatically at end of combat; also cured with Cure Spell

## POSITIVE STATUS

	STATUS	CAUSE	EFFECTS
	Anger	Item, Enemy Attack	Attack at 1.5 times normal strength for x number of turns
	Warm Glow	Item, Taking Bath	Recover health for predetermined amount of time
	Boost	Item, Spell, Special Rune	Attack strength doubles for three turns. After Boost fades, take half the damage inflicted on opponents yourself.
	Invincible	Item, Spell	Become invincible to opponents' attacks, but cannot move.
	Panic	Special Enemy Attack, Item	Movements are chosen at random. Spell Points do not decrease.
	Energize	Item, Spell	Spell attacks are at 1.5 times normal strength for x number of turns

## COMBAT

If you encounter an enemy in the Map Movement Screen, the display will change to a combat scene. When combat begins, use the Combat Commands to conduct the engagement. The Combat Commands consist of the following four types:

## FIGHT:

Selecting this command brings up the following six additional commands to choose from:

- ATTACK:** attack physically with weapons
- DEFEND:** reduce damage from opponents' attacks
- RUNE:** cast a spell
- ITEM:** use selected Item
- UNITE:** attack in combinations
- SHIFT:** change front line and rearguard positions.

## RUN/LET GO:

Use this command when you want run from an opponent without fighting. You won't necessarily be able to get away, however.

## BRIBE:

It is possible to avoid combat by bribing the enemy with money. If the amount of the bribe is too low, however, they may not let you get away.

## AUTO:

This command chooses attacks for all party members based on the weapons they are holding.

## FORMATION:

During combat, both hostile and friendly forces are arranged in either frontline or rearguard positions.

**FRONTLINE:** Characters in the frontline can make any and all kinds of attack, including hand-to-hand combat. The disadvantage is that they are more vulnerable to taking damage themselves as a result.

**REARGUARD:** Characters in the rearguard can only attack with magic or bow and arrow. On the other hand, the enemy cannot engage them in hand-to-hand combat. If a character in the frontline becomes incapable of combat, the character behind him in the rearguard takes his place in frontline.

Weapons are categorized as Short Range (S), Medium Range (M), and Long Range (L), according to the following chart:

S	SHORT-RANGE	Usable only in the frontline.
M	MEDIUM-RANGE	Usable by both frontline and rearguard characters. Can only hit targets in the opponent's frontline.
L	LONG-RANGE	Usable by both frontline and rearguard characters. Can hit targets in both the opponent's frontline and rearguard.

## COMBINATION ATTACKS (UNITE)

Choosing the Unite Command allows characters to fight in combination with one another. Specific character combinations within a party can accomplish special attacks.

## EXAMPLES:

**THE HERO and JOWY** → "Childhood Friend Attack" → inflicts damage on the opponent as a whole.

**VIKTOR and FLICK** → "Fatal Connection Attack" → inflicts 1.5 times the normal damage on their opponent.

There are many other possible combination attacks. You will need to experiment by combining the members of your party in various ways.

## MAJOR BATTLES

Once you have progressed through a certain amount of the story, you will begin engaging in major battles. In accordance with your progress through the scenario, speaking with your strategist will cause you to enter into a major battle.

Battles between the Army of the League and the Imperial Army are conducted by advancing through set spaces, as in a simulation game. Units are comprised of infantry, archers, and spellcasters. The distinguishing characteristics of each are as follows:

**INFANTRY:** good against hand-to-hand attacks. Weak versus archery or magic attacks.

**ARCHERS:** can attack at range, up to one space away. Weak versus hand-to-hand attacks.

**SPELLCASTERS:** can attack at range, up to two spaces away. Weak versus hand-to-hand attacks.

## CONDUCTING MAJOR BATTLES

Move the cursor over a unit to display its field of movement. Select a location within that unit's field of movement, and the unit will move there. If, after moving, there are enemy units within range in the area, move the cursor to the enemy unit. A menu with the commands "Attack," "Wait," or "Rune" will appear. Make your selection, then act.

**ATTACK:** attack physically with weapons.

**WAIT:** hold current position.

**RUNE:** attack by casting spells.

•Note that characters leading units may sometimes have special abilities as well.

The opposing forces move when all friendly forces have moved, or when the player either presses the Start Button, or moves the cursor to an area where there are no units and presses the Select Button. Actions repeat back and forth in this fashion. If the player meets the Victory conditions for the battle, or destroys his opponent's units, then the battle ends in Victory for the Army of the League. Conversely, if the player's conditions for defeat are met, or if his own forces are destroyed, then the battle ends in defeat for the Army of the League, which can include his castle being occupied by enemy forces.

•Note that these actions can be carried out in Auto Mode.

## FIRE RUNE

LEVEL	NAME	EFFECT
1	Flaming Arrows	60 damage to monsters as a whole
2	Fire Wall	150 damage to single row of monsters
3	Dancing Flames	300 damage to monsters as a whole
4	Explosion	700 damage to monsters as a whole

## WATER RUNE

LEVEL	NAME	EFFECT
1	Kindness Drops	Fully heal one character in the party
2	Protection Mist	Increase magic resistance for all party members by 20% for three turns
3	Kindness Rain	Heal all party members by 300 points
4	Silent Lake	Negate all spellcasting for three turns, friend and foe alike

## WIND RUNE

LEVEL	NAME	EFFECT
1	Wind of Sleep	Put row of monsters to sleep
2	Healing Wind	Fully heal one character
3	The Shredding	450 damage to monsters as a whole
4	Storm Warning	Reflect attack spell directed at oneself back on caster

## EARTH RUNE

LEVEL	NAME	EFFECT
1	Clay Guardian	Increase one character's defense
2	Revenge Earth	Give one character 100% accuracy with retaliatory attacks for three turns
3	Canopy Defense	Repel one spell cast on group
4	Earthquake	800 damage to monsters on ground as a whole

## LIGHTNING RUNE

LEVEL	NAME	EFFECT
1	Angry Blow	100 damage to one monster
2	Running Thunder	120 damage to one column of monsters
3	The Shredding	600 damage to one monster
4	Storm Warning	1000 damage to one monster

## EXORCISM RUNE

LEVEL	NAME	EFFECT
1	Scolding	30 damage to one monster, double damage to undead
2	Yell	Heals the condition of being unable to fight
3	Charm Arrow	400 damage to monsters as a whole, double damage to undead
4	Scream	Heal all party members by 300 points

## SHINING SHIELD RUNE

LEVEL	NAME	EFFECT
1	Great Blessing	Heal all party members by 70 points
2	Shining Light	130 damage to enemy as a whole
